DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 250 words. It is important that the abstract not exceed 250 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

In the abstract, lines 5, 8, 10 should be avoided.

2. The disclosure is objected to because of the following informalities: In the specification page 6, line 29, the patent number should be 5,581,464.

Appropriate correction is required.

Conclusion

Art Unit: 3661

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Riley et al. (U.S. Patent No. 5,445,024) disclose an automotive motion recorder.

Yamawaki (U.S. Patent No. 5,446,659) discloses a traffic accident data recorder and traffic accident reproduction system.

4. This application is in condition for allowance except for the following formal matters:

The specification and the abstract as stated above need appropriate correction.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
